

ULTRA DRY S LUBE

DESCRIPTION	<p>Ultra Dry S Lube is a new fully synthetic chain lubricant, specifically designed for use on plastic, other non-metal chains and stainless steel for the transportation of product packages on table top conveyors in the food and beverage industry when a water-free or non-aqueous operation is required. Ultra Dry S Lube is pH-neutral and is suitable for a wide variety of applications.</p>
DIRECTIONS	<p>Manual</p> <p>Ensure table top conveyor belts are clean and then fully moisten with Ultra Dry S Lube by means of damp sponges or a manual spray device (e.g. spray bottle or pump up sprayer) prior to operation. Repeat the spraying or moistening periodically during the day as needed</p> <p>Automatic</p> <p>Through a central conveyor lubricant dosing system, the concentrated Ultra Dry S Lube is applied, at the start of your operation, to the conveyor belt and periodically during the day depending on the type of package being run on the conveyors and the speed of the system. Due to the fine layer of non-aqueous (water free) lubricant on the belt, cardboard packaging, PET bottles, etc. are transported smoothly without damage. At the same time, the conveyor belts are kept clean, which reduces microbiological contamination. Ultra Dry S Lube reduces conventional wear and tear on the machinery by reducing the drag placed on the system's motors.</p>
FEATURES	<ul style="list-style-type: none">• Safe for use on all metal surfaces. Dissolves easily in water during cleanup of conveyor belts.
BENEFITS	<ul style="list-style-type: none">• Reduces microbiological contamination• Improved Safety - dry floors and machines reduce danger of slip and fall injuries• Reduced water consumption - Non-Aqueous application significantly reduces the amount of water used in the processing environment
SAFETY INFORMATION	<p>UTILIZE APPROPRIATE PERSONAL PROTECTIVE EQUIPMENT AS PER SDS.</p> <p>HANDLE AND STORE AS INDICATED ON PRODUCT LABEL.</p> <p><u>IF ON SKIN:</u> In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if irritation persists. Wash clothes before reusing.</p> <p><u>IF IN EYES:</u> In case of contact, immediately flush with plenty of water for at least 15 minutes. Get medical attention.</p> <p><u>IF SWALLOWED:</u> Drink large quantities of water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention.</p> <p>Consult your Safety Data Sheet for additional safety information.</p>
