## DCS Academy I

Presented by **DeLaval Cleaning Solutions** – a leader in the chemical sanitation industry.

The objective of our training program is to increase your working knowledge of sanitation and sanitation practices as they relate to the dairy and food industries.

The course will focus on chemical sanitation, cleaning systems, and factors that affect your sanitation program. This program is designed for your QA/QC, Sanitation, and Operation Managers – so they may return to their plants with a stronger foundation to improve quality, reduce operating and cleaning costs, and improve cleaning effectiveness.

The knowledge gained in this course may then be used by your facility as tools for continuous improvement in your sanitation operations.

DeLaval Cleaning Solutions – together with other industry experts – have specifically designed this training program to help you improve the quality of your product by improving the quality of your cleaning practices.

This session will increase your working knowledge and understanding of sanitation processes and improve your overall plant cleaning effectiveness
