

BioHatch™

Sanitizer - Disinfectant

Product Number 4235

BioHatch™ is a 7.5% active quaternary compound with a low foam formulation intended for use in poultry houses, hatcheries, and other animal quarters to effectively disinfect and deodorize the surfaces after being cleaned with a conventional cleaner. BioHatch™ is approved for use in food processing plants, including dairy, and cheese plants. It is an effective product in eliminating cross contamination of bacteria.

Benefits

- Food contact and non-food contact surface sanitizing
- Hard water tolerance up to 300 ppm (as CaCO₃)
- Highly tolerant to organic soil residues
- Non corrosive to stainless steel
- Compatible with food production equipment

Features

- Authorized by USDA for use in food establishments under Code D2
- No rinse quat sanitizer
- Highly effective against a wide range of common microorganisms found in the food production environment

Properties

- Appearance Clear, colorless liquid
- Quat content..... 7.12 – 7.87 %w/w
- pH (as is)..... 6.5 – 8.0

Directions for Use

Method and recommended coverage

BioHatch™ is for use in food processing plants, dairy and cheese plants.

Concentration

Sanitation of Food Processing Equipment and other hard non-porous surfaces in food contact locations: apply a solution of 1 oz. BioHatch™ in 4 gallons of water (150 ppm active). Surface should remain wet for at least one minute followed by an adequate draining and air drying.

Disinfection of Poultry Equipment, Animal Quarter and Kennel: after thoroughly cleaning, disinfect with a solution of ½ oz. of BioHatch™ in 1 gallon of water using a mop, cloth, or brush. Surfaces should remain wet for at least 10 minutes.

Sanitizing Food Eggs: To sanitize previously cleaned food grade eggs and egg product processing plants, spray with 1 oz. BioHatch™ in 4 gallons of water (150 ppm active).

Consult your DeLaval Cleaning Solutions representative for questions on specific applications.

Safety Information

IF ON SKIN

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.

IF IN EYES

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing. Call a Poison Control Center or doctor for treatment advice.

IF SWALLOWED

Call a Poison Control Center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the Poison Control Center or doctor. Do not give anything to an unconscious person.

IF INHALED

Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a Poison Control Center or doctor for treatment advice.

Consult your Safety Data Sheet for additional safety information
