

IDC20™ Concentrate

A concentrated iodophor for manufacturing
use in FDA registered facilities only
Product Number 0550

IDC20™ Concentrate is an iodophor concentrate that utilizes non-ionic surfactants. It is specially formulated as a base of manufacturing topical iodine products. IDC20™ Concentrate may be used to manufacture topical animal health care products and related antimicrobials. IDC20™ Concentrate is not intended for use as a component of iodophor based sanitizers and disinfectants.

Benefits

- Reduces shipment cost of final topical iodine products
- Facilitate manufacturing of other topical animal health care products and related antimicrobials

Features

- Concentrated iodophor used for manufacturing in FDA registered facilities

Properties

- Appearance Dark brown liquid
- Titratable iodine 20% w/w
- pH ~ 2

Directions for Use

Manufacturing instructions must be developed by the formulator prior to use of this product.

Mix well in drum before sampling and before each use. Avoid contact with soft metals. IDC20™ Concentrate will flow and mix more easily if a day or two prior to formulating it is gradually warmed to 70°F - 100°F and then slowly added in a thin stream while mixing.

It is the responsibility of the distributor of topical antimicrobials to obtain any necessary regulatory approval from the Food and Drug Administration for products formulated from IDC20™ Concentrate which carry specific label directions for treatment or prevention of animal diseases.

Consult your DeLaval representative for exact usage and mixing instructions.
